To become eligible for accommodations, a student must register with the office by providing recent documentation of their disability. Registered students are responsible for requesting accommodations each semester. The “mission” of the office is to provide or coordinate reasonable accommodations. A reasonable accommodation is a modification or adjustment to a course, program, or activity that enables a qualified student with a disability to obtain equal access. The accommodations provided are in response to a student’s perceived barrier to access. In other words, a student must, at a minimum, identify how their disability is preventing them from having access. Therefore, the services and accommodations provided are intended to reasonably remove a barrier. The office does not provide treatment or teach students how to minimize the impact of their disability. Instead, reasonable modifications are made to a course, program, or facility to allow the same access as experienced by students without disabilities. An accommodation is considered reasonable only if it does not significantly alter the essential components of a course or program.</p>
