The PNW DAC seeks to provide access to a student's PNW experience. Any students with physical, learning, mental health, or medical challenges, whether or not they've had an IEP, 504 plan, or ISP in K-12, should contact the DAC to find out if they qualify for services. Students need to have documentation that their challenge(s) substantially impair a major life activity. The DAC can discuss the types of documentation that are acceptable. Students do not have to consider themselves disabled to qualify for services. Some of the more common reasons to use our office are anxiety, depression, Dyslexia (or other learning disabilities), ADHD, Autism Spectrum Disorder, Diabetes, TBI, PTSD, and Crohn's disease.

Some differences between high school and college include that academic standards cannot legally be altered, students have much more control, and it is up to the student to decide if they will register with the DAC but accommodations at the college level can only be provided by following the protocol for that university's version of the DAC. It is important to register BEFORE classes start preferably in June if you can, as accommodations are not retroactive. Set yourself up for success by planning ahead and utilizing all of the supports universities offer.

We are happy to meet with any high school students and their parents to discuss how accommodations work in college and how they are different from high school even before you decide what university you are attending. We are also happy to meet with high school staff and youth workers. For more information, please contact the DAC.
